

2017 Disc-FX Cadaver Training Session

A Disc-FX cadaver training session was concluded in Lingang, Shanghai on October 26, 2017. The session was co-sponsored by Bonovo Orthopedics (Beijing), Inc. and elligence. The well-recognized Korean MIS surgeon, Dr. Jin Sung Kim lectured a group of the nationwide attendees about the surgical techniques and indications. He taught the MIS surgical procedure using Disc-FX and shared his cases and experience. Dr. Kim used both a phantom and a cadaver specimen to demonstrate the surgical technique. Each trainee had the hands-on experience of practicing the needle placement and entry point on the cadaver specimen.
